3. Online Airline Reservation System

## Aim:

To create a UML Class Diagram for an Online Airline Reservation System to manage flight bookings, class categories, and waiting lists.

Procedure:

1. Identify entities: User, Admin, Booking, Flight, Class Management, Waiting List, Holds, Deadlines.
2. Define attributes and operations.
3. Establish relationships and depict interactions.
4. Verify and refine the diagram.

Diagram:

Result:

A UML Class Diagram demonstrating the structure of an airline reservation system.
